

### TCI<sup>®</sup> Diablo Blackout Shifter™ Versatile, Available In Black

Ashland, MS – Now available in a sleek black finish, the TCI<sup>®</sup> Diablo Blackout Shifter™ is a lightweight street rod/race component that includes everything needed for installation.

The patent-pending Diablo Shifter from TCI<sup>®</sup> remains the most versatile shifter on the market, but now it is available in black to correspond with dark interiors. The fully configurable design allows the customer set up the shifter with either a front- or rear-cable exit. It can also be configured with either a forward or reverse shift pattern for a two-, three- or four-speed transmission. There is no longer a need to buy and replace parts if you are changing shift order/configuration, or changing transmissions entirely. When upgraded to the two-button version, the shifter can be also customized to control nitrous, transbrake or shifting.

The shifter housing is made from an aluminum extrusion. Everything needed for installation is included in the box, including the shifter (configurable for any Ford, GM or Chrysler application), high-quality shift cable, transmission-mount cable brackets and neutral safety and reverse-light switches. The shifter is also available without a housing for console-mount applications.

#### **About TCI<sup>®</sup>**

When TCI<sup>®</sup> opened its doors in 1968, it was a modest operation dedicated to delivering high performance transmission-related parts to a small group of drag racers. From those humble beginnings in Memphis, TN, TCI<sup>®</sup> has grown to be one of the largest and most technologically advanced manufacturers of high performance aftermarket drivetrain products. Now located in Ashland, MS, some 45 miles from parent company the COMP Performance Group™, TCI<sup>®</sup> continues to set trends and expand its line of quality transmission, torque converter and accessory parts.
