

Driven Racing Oil™ Defender + Booster Fuel Additive

Huntersville, NC – This new additive from Driven Racing Oil™ provides a wide variety of protection and performance enhancements for gasoline-powered engines.

There are numerous products on the market that claim to be “octane boosters.” What makes Driven Defender + Booster so special is that while it raises the octane in unleaded fuels, it also reduces valve seat wear and protects against the corrosion deposits common with today’s gasoline. Like Driven Carb Defender and Injector Defender Fuel Additives, this product features corrosion inhibitors that control combustion chamber residue, as well as clean and preserve surfaces of the fuel system. By cleaning and controlling combustion chamber and intake valve deposits, Defender + Booster Fuel Additive protects against detonation and improves fuel economy. The additive is ideal for all carbureted and fuel injection vehicles, including motorcycles and marine engines. Each 10-ounce bottle treats up to 25 gallons of gasoline, and regular use has been proven to lower emissions.

Part Number: #70056

Price: \$9.99

About Driven Racing Oil™

Born from Joe Gibbs Racing, one of the most successful NASCAR teams of the past two decades, Driven Racing Oil™ utilizes cutting-edge lubricant technology and on-track research for maximum performance gains from all of its product offerings. Competition drives innovation, and Joe Gibbs Racing originally developed the Driven brand of oils to advance engine and driveline performance on the racetrack. From full synthetic race oils to engine break-in oils, Driven offers a wide range of race and street products that deliver performance, protection and value.
